

Brush Stuff

Brush and Roller Conditioner

- Up to 100 uses per tube
- Prevents paint cling
- Better brush performance
- Longer brush and roller life
- Fast and easy clean-up
- Works with natural or synthetic bristles

Brush Stuff makes brush cleaning easier. It helps clean and maintain brushes and roller covers, prolonging their life and reducing clean-up time.

Brush Stuff is a unique product that helps decorators clean and maintain brushes and roller covers - prolonging their life and reducing clean-up time.

Applied to quality brushes before use, Brush Stuff coats the bristles, making the brush more supple and preventing paint and stain from sticking. When it comes to cleaning, the paint washes off quickly and easily, and, when stored, the brushes stay soft.

Why use brush stuff?

Brush Stuff acts like a barrier cream, cutting clean-up time in half by preventing paint from clinging to the bristles of the brush or roller cover when it dries.

It is suitable for use with oil based and water-based paints, and can be used to protect natural or synthetic bristles, as well as roller covers.

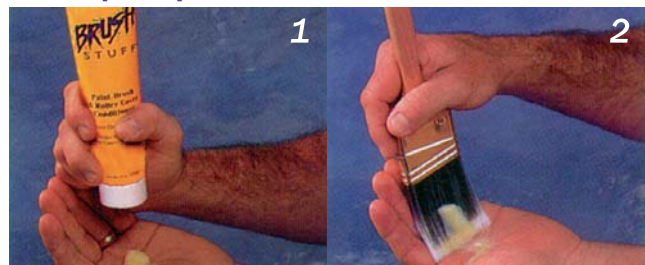

Brush Stuff conditions the brush or roller cover, providing easier, smoother application without affecting pick-up or lay-off.

How much time will you save?

Each tube of Brush Stuff contains enough for 100 applications.

If Brush Stuff reduces the time taken to clean an oil brush from 10 to 5 minutes, that means each tube could save you 500 minutes (over 8 hours) of clean up time.

Four simple steps

FIRST APPLICATION

1. Squeeze small amount of Brush Stuff onto the palm of the hand.
2. Work Brush Stuff thoroughly into the brush or roller.

3. Paint as normal.
4. Clean brush or roller with appropriate solvent, re-apply Brush Stuff and store tools as normal.

FURTHER APPLICATIONS

For subsequent applications, just follow the steps above. Maximum protection is usually achieved after six applications. Thereafter, apply Brush Stuff prior to painting.
