- Removes dirt and grey from weathered exterior woods.
- Removes weathered water sealers.
- Does not contain bleach.
- Ready-to-use.
- Available in 4 litre and convenient, easy-to-handle 10 litre recyclable plastic containers.

HOW WOOD SHOULD BE TREATED

# PowerLift™

## Deck Stain & Finish Remover

PowerLift is a powerful liquid remover formulated to lift old stains and finishes from decks, fences, siding, and other exterior wood. It also effectively removes dirt and grey from weathered, unfinished exterior woods. The effectiveness of PowerLift on a particular stain or finish can be tested by using one of our free samples.

### Why use PowerLift

Some strippers are too strong or too expensive for the job at hand. Many deck cleaners are only designed to remove dirt or brighten a lightly weathered deck. PowerLift is a strong, affordable remover that handles the toughest of jobs with ease.

### How to apply PowerLift

- Take normal precautions such as covering areas you don't want to clean. Wet plants and shrubs.
- Wear eye and skin protection. Use PowerLift as is; do not thin.
- Apply a uniform coat of PowerLift to the surface to be cleaned, and be sure to keep the area wet with PowerLift for 10 to 15 minutes. (Some films may require a longer dwell time).
- When the finish begins to lift from the wood, scrub as needed with a stiff bristle brush (do not use a wire brush).
- If stubborn areas remain, repeat the application in those areas.
- Once the old finish is removed, rinse with large amounts of fresh water.

- PowerLift may darken cedar and redwood. To brighten wood after using PowerLift, dilute Dekswood 1:4 with water and spray or roll on to surface; wait 10 minutes, then rinse off.
- Allow the wood to dry thoroughly (2-3 warm, dry days minimum) before refinishing. Enhance the beauty of your freshly cleaned deck with CWF or CWF-UV Clear Wood Finishes from Flood.

### Coverage, clean up and storage

- Four litres of PowerLift will clean from 15 to 25 square metres. Clean up tools with soap and water.
- Keep container closed tightly when not in use. Keep from freezing.

### Available Sizes:

4 litre, 10 litre.
