

# POWERLIFT FACT SHEET

## **Description**

*Powerlift* is a powerful liquid remover formulated to lift old stains and finishes from Decks, Fences, Timber Cladding and other woods. *Powerlift* will remove old and weathered solvent based Decking Oil and Decking Stains, it will even remove Linseed Oil. One of *Powerlift's* major jobs is to remove tannin or sap from tannin rich timbers such as Merbau / Kwila.

## **Purpose**

Some strippers are too strong or expensive for the job at hand. Many Deck cleaners are only designed to remove dirt or brighten a lightly weathered deck. *Powerlift* is a strong yet affordable remover that handles the toughest jobs. Ideal for both Trade & D.I.Y projects.

## **Application**

Apply *Powerlift* undiluted to damp timber with a brush, Lambswool applicator or a spray. Work well in to the substrate with a stiff broom, leave for 10 minutes before power washing off. Do not allow *Powerlift* to dry on the surface.

## **Drying Time**

1-2 hours depending on the surface condition and temperatures.

## **Container Size**

*Powerlift* is available in 2.5, 4 and 10ltrs.

## **Coverage**

*Powerlift* will cover 4 to 6 Sq metres per 1 litre.

## **Clean-up**

Water.

## **Safety Directions**

Follow common sense painting procedures. Wear protective glasses. Wash skin and other areas that have come in to contact with *Powerlift* well with soap and water. *Powerlift* can become slippery when used on smooth dressed timber.

## **Waste Disposal**

Dispose of any excess product in accordance with local regulations.
