

SPA-N-DECK FACT SHEET

Description

Spa-N-Deck Exterior Timber finish is a 100% acrylic, premium –quality coating for all timber species. It will protect and decorate Timber Decks, Weatherboard Cladding as well as Outdoor Furniture. It provides unsurpassed appearance and protection in the most severe ultraviolet environments. It bonds “in” and “on” the wood, providing a tough durable lustrous finish that enhances the natural character of the wood.

Purpose

To protect and decorate exterior timber with a minimum of time. Spa-N-Deck is the fast and best way to coat all Decking, as most Decks can be cleaned and coated in one day. Ideal for both Trade & D.I.Y projects.

Application

Apply the first coat of Spa-N-Deck to wet timber with a Brush or Lambs Wool applicator, Spa-N-Deck can be sprayed then back brushed. Be sure to apply Spa-N-Deck with the grain and treat only 2 to 3 boards at a time for the full length of the board. **Note:** Both Powerlift and Spa-N-Deck Prep must be used on all hardwood timber before application of Spa-N-Deck.

Drying Time

Touch dry 1-2 hours depending on the surface condition and temperatures, and recoat 4 hours.

Container Size

Spa-N-Deck is available in 2.5, 4 and 10ltrs.

Coverage

Depending on surface porosity. Spa-N-Deck will cover 6 to 8 Sq metres per 1 litre.

Clean-up

Water.

Safety Directions

Follow common sense painting procedures.

Waste Disposal

Dispose of any excess product in accordance with local regulations.
